

Information on Sewer System Work

This week the sewer system for Evergreen Jr. and Dickinson Elementary has been experiencing some difficulties and the district facilities staff have been working with King County Public Works to correct the issues. They have a good plan in place for managing the needs of the system without causing any health/sanitation concerns for either Evergreen Jr. and/or Dickinson Elementary. From time to time over the next week, you may see vehicles and crews working to correct the problem. We will continue to have school on a regular basis as they solve the problem. Thank you.
