

Accessing enVision Math from Home

Dear Parents:

We are very excited to announce the addition of enVision Math to our educational curriculum here at Lake Washington School District. enVision math offers you the opportunity to look inside your child's day-to-day learning. This letter will help you understand how you and your child can access the program from home.

How to help your student access enVision Math:

1. Open your Internet browser – Internet Explorer v6.0 (PC) or Safari v2.0 (Mac OSX) and a high-speed Internet connection recommended.
2. Type the URL: <http://www.lwsd.org> or <http://www.lwsd.org/muir>. If you choose the Muir site go to either Academics or For Parents to find the Student Portal.
3. Once you click the Student Portal a browser session will be launched and your student will be asked for his/her login information.
4. **What out for those pop up blockers. Choose Always allow pop ups from this site.**
5. When the login screen displays have your child enter his/her district login ID and password. You will need to type LWSD\ on the username line before the username is entered or the login will fail. An example would be LWSD\s-jsmith.
 - a. The password will not be displayed, so be careful while typing it. All passwords are at least 8 characters long.
 - b. K-2 passwords begin with a s and the # sign and end with the last six digits of their student ID number. (example: s#012345)
 - c. 3-6 passwords are student created. They must start with a capital letter, have some lowercase letters and end with a number.
6. The example to the right shows a user logging in with the proper username and password.
7. Click OK
8. Students then enter the portal, where they will be able to see their child's scores and other links, including the enVision Math link on the far right.
9. Close enVision Math and then logout from the Student Portal when you have finished.
