

Monday, January 30th:

Construction Update: Work on the new building is scheduled to begin this spring. Contractors will put up fences separating the school from the construction zone and begin work on the new building either just before or right after Spring Break (which is April 2nd – 6th this year). The City is requiring the building contractor to use 75th street for access, so there will be some changes to our parking lots and student drop-off:

The exit driveway will be blocked off for the exclusive use of the contractor, and our main parking lot will become two-way: This is going to mean that student drop-off and pickup will have to be on 75th. When the time comes for the traffic to change, new signs, flaggers, and traffic police will be on site to help keep things running smoothly – look for more notices as we get closer to the start of construction!

Look for more information as the start of construction approaches. If you have questions or concerns, don't hesitate to contact Michael Romero (mromero@lwsd.org) via email.
