## Earth Day

Earth Day is a holiday that happens on April 22. Since 1970, people have celebrated Earth Day by picking up trash, recycling paper and cans, and planting trees. The pictograph shows how many trees 3 children planted on Earth Day.

Use the pictograph to solve the problems.

## All the Parts

Just like your body must have all of its parts to work properly, a graph must also have all of its parts to be complete. Let your eyes and brain work together to help you learn the parts of a graph.
